

VIVA DECOR: DECOR PASTE

Product Data:

item no.:	see price list
EAN-Code:	see price list
contents:	bucket of 1l or 2.5l
packaging unit:	see price list

Use and advantages:

For decorative creation of inside walls:

- water-based product
- especially made for creation of hard-foamed wall elements out of expanded polystyrene (EPS)
- for painting and dabbing
- shock resistant

Technical data:

basis:	water-based compound
viscosity:	thick fluid, paste
content of VOCs:	< 1%
colour:	brick-red, sandy beige, concrete grey, graphite grey
further processing:	after 2-3 hours at a temperature of +20°C
shelf life:	12 months, in original sealed buckets, to be protect against freeze and heat development
consumption:	<p>1 litre bucket: covering base painting: about 3,5m² decorative second painting: about 5,0 m²</p> <p>2,5 litres bucket: covering base painting: about 8,5 m² decorative second painting: about 12,5 m²</p>

According to ordinance (EG) 1272/2008 (CLP), the Decor Paste is not regarded as hazardous.

Processing:

The basis has to be clean, dry, solid, smooth and able to take a weight. At first the wall elements are mounted to the wall. Afterwards, the surface is prepared as mentioned above and the paste is applied as basic covering paint in the colours concrete grey or sandy beige with a flat brush. After the drying of the basic cover painting, a second painting of graphite grey or brick-red is dabbed and roughly applied on the protruding brick elements.
